Janani Sathya Narayanan is a detail-oriented Oracle Functional Consultant with 4 years of experience specializing in Core HR, Talent, and Recruitment modules. She has successfully led implementations for major clients, optimizing HR operations through configuration, process automation, and analytics. Janani demonstrates strong expertise in Fit-Gap analysis, UAT coordination, and stakeholder engagement, consistently delivering measurable improvements in data integrity and workflow efficiency. Her technical proficiency spans Oracle HCM, analytics tools, and Salesforce development, complemented by a Master’s in Computer Science with academic exposure to predictive modeling and NLP. Janani stands out for her process optimization skills, cross-functional collaboration, and commitment to documentation and training.
